- Dean's Honour List

WORK EXPERIENCE

Bank Of Montreal, Toronto, Ontario, Canada — Winter 2025
Data Analyst

- Automated Python-based pipelines to ensure data quality and compliance across large datasets.
- Built dashboards and reporting tools that delivered real-time insights to decision makers.
- Streamlined repetitive workflows, freeing analysts to focus on higher-value projects.

Dialogix Services Inc, Toronto, Ontario, Canada — June 2025-Present
Co-Founder

- Launched full-stack classroom technology with web, desktop, and PowerPoint integrations.
- Built DevOps pipelines and rigorous testing systems, ensuring reliability under live conditions.
- Designed user-focused interfaces, aligning technology with real-world stakeholder needs.

Zenith Vision Analytics, Ontario, Canada — 2024-Present
Founder

- Built ERP/CRM platform integrating sales and behavioral data for Canadian clients.
- Applied regression and decision tree models for demand forecasting and decision support.
- Implemented geospatial analytics pipelines in Python with PostGIS to map pools, join detections to addresses, and power interactive dashboards.

Vector Institute, London, Ontario, Canada — Summer 2024
Generative AI (Artificial Intelligence) Research Intern

- Built machine learning pipelines in PyTorch/sklearn with transparent, reproducible workflows.
- Developed specialized transformer models aimed at translating EEG Signals into images aiming to re-produce participant visual experiences.

Scotiabank, Toronto, Ontario, Canada — Summer 2023
Small Business Analyst

- Completed financial risk assessments by analyzing cash flow, collateral, industry trends, and client documentation.
- Produced pricing recommendations and competitive research reports that informed underwriting and strategic decisions.
- Improved data-validation workflows and documentation standards to enhance reporting accuracy and decision reliability.
